

Evan Kinnear
Chapter 2
Lab Accessing the Command Line

Figure 1. The lab-grade command results & The history command results. (Both are visible.)

The screenshot shows a terminal window titled 'student@workstation:~' with a menu bar (File, Edit, View, Search, Terminal, Help). The terminal output is as follows:

```
bash: history: command not found...
[student@workstation ~]$ history
 1 history
 2 poweroff
 3 sudo poweroff
 4 poweroff
 5 whoami
 6 exit
 7 lab cli-review start
 8 date
 9 date +%r
10 file zcat
11 wc zcat
12 head zcat
13 tail zcat
14 tail -n 20 zcat
15 history
16 history
[student@workstation ~]$ !9
date +%r
05:38:47 PM
[student@workstation ~]$ lab cli-review grade

Grading the student's work on workstation:

· You completed attempting these tasks..... PASS

Overall lab grade..... PASS

[student@workstation ~]$ lab cli-review finish

Cleaning up the lab on workstation:

· Removing the files created..... SUCCESS
Lab finished.

[student@workstation ~]$
```

The terminal window is part of a larger interface. At the top left is the CSN logo and navigation links (Home, Reservation, evan.kinnear-1@student.csn.edu). Below that is a breadcrumb trail: MyNETLAB > RHSA I 8.2 H70 Pod 6912 > Reservation 56494 > Instructions on Accessing Red Hat Academy Lab Content. On the right, there's a 'Time Remaining' section showing 0 hrs and 08 min, and a 'Request More Time' button. The terminal window itself has a title bar with 'Activities', 'Terminal', and a date/time indicator 'Jun 10 17:41'.

(If you FAILED the lab, but decided to submit it as is, please make sure you include the whole history here, even if it needs more than one screenshot)
