Chapter 10

Lab Configuring and Securing SSH

The lab-grade and history command results

```
[root@serverb ~]# vim /etc/ssh/sshd_config
[root@serverb ~]# history 6
 8 vim /etc/ssh/sshd_config
 9 systemctl reload sshd
10 vim /etc/ssh/sshd_config
11 systemctl reload sshd
12 vim /etc/ssh/sshd_config
13 history 6
[root@serverb ~]# exit
logout
[production1@serverb ~]$ history 5
 1 su -
 2 history 5
[production1@serverb ~]$ exit
logout
Connection to serverb closed.
[production1@servera ~]$ history
 1 ssh-keygen
 2 ssh-copy-id production1@serverb
 3 ssh production1@serverb
 4 history
[production1@servera ~]$ exit
logout
[student@servera ~]$ exit
logout
Connection to servera closed.
[student@workstation ~]$ lab ssh-review finish
```

Completing the lab on servera and serverb:

```
· Restoring original /etc/ssh/sshd_config on serverb..... SUCCESS
· Deleting production1 and production2 from servera..... SUCCESS
· Deleting production1 and production2 from serverb..... SUCCESS
· Removing temporary files of the exercise from serverb..... SUCCESS
· Disabling sshpass on servera..... SUCCESS
· Disabling sshpass on workstation..... SUCCESS
```

Lab finished.

```
[student@workstation ~]$ █
```
